**Consolidated Financial Statements for the
Nine Months Ended September 30, 2019 and 2018 and
Independent Auditors' Review Report**

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders
Syncmold Enterprise Corporation

Opinion

We have audited the accompanying consolidated financial statements of Syncmold Enterprise Corporation and its subsidiaries (collectively referred to as the "Group"), which comprise the consolidated balance sheets as of June 30, 2019 and 2018, the related consolidated statements of comprehensive income for the three months ended June 30, 2019 and 2018 and for the six months ended June 30, 2019 and 2018, the consolidated statements changes in equity and cash flows for the six-month periods then ended, and the notes to the consolidated financial statements, including a summary of significant accounting policies. Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard NO.34 "Interim Financial Reporting" endorsed and issued into effect by the Financial Supervisory Commission of Republic of China. Our responsibility is to express a conclusion on the consolidated financial statements based on our reviews.

Scope of Review

Except as explained in the following paragraph, we conducted our reviews in accordance with Statement of Auditing Standards No. 65 "Review of Financial Information Performed by the Independent Auditor of the Entity". A review of (consolidated) financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As disclosed in Note 11 to the consolidated financial statements, the financial statements of (some) non-significant subsidiaries included in the consolidated financial statements referred to in the first paragraph were not reviewed. As of September 30, 2019 and 2018, combined total assets of these non-significant subsidiaries were NT\$ 2,240,766 thousand and NT\$ 2,192,638 thousand, respectively, representing 27.14% and 25.42%, respectively, of the consolidated total assets, and combined total liabilities of these subsidiaries were NT\$ 862,561 thousand and NT\$ 848,819 thousand, respectively, representing 29.98% and 25.54%, respectively, of the consolidated total liabilities; for the three months and nine months periods ended September 30, 2019 and 2018, the amounts of combined comprehensive income of these subsidiaries were NT\$ 60,213 thousand, NT\$ 59,537 thousand, NT\$ 79,890 thousand and NT\$ 152,405 thousand, respectively, representing 35.36%, 43.61%, 12.73% and 26.24%, respectively, of the consolidated total comprehensive income. Also, as stated in Note 12 to the consolidated financial statements, the investments accounted for using the equity method were NT\$ 150,058 thousand and NT\$ 115,354 thousand as of September 30, 2019 and 2018, respectively. The Group's share of profit of associates accounted for using the

equity method was NT\$ 4,577 thousand, NT\$ 8,459 thousand, NT\$ 12,745 thousand, and NT\$ 24,089 thousand for the three months and nine months ended September 30, 2019 and 2018, respectively, and these investment amounts as well as additional disclosures in Note 27 “Information on Investees” were based on the investees’ unreviewed financial statements for the same reporting periods as those of the Company.

Conclusion

Based on our reviews, except for the adjustments, if any, as might have been determined to be necessary had the financial statements of the non-significant subsidiaries as described in the preceding paragraph been reviewed, nothing has come to our attention that caused us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects the consolidated financial position of the Group as of September 30, 2019 and 2018, and its consolidated financial performance and its consolidated cash flows for the nine months then ended September 30, 2019 and 2018 in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34 “Interim Financial Reporting” endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

SYNCMOLD ENTERPRISE CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2018 AND 2019 (In Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL INFORMATION

Syncmold Enterprise Corporation (the "Corporation") was incorporated in the Republic of China ("ROC") in July 1979 and is mainly engaged in the processing, manufacturing, trading, technology licensing and related import and export business of various metal molds, plastic molds and electronic parts.

The Corporation's shares were approved for listing on the emerging stock board of the Taipei Exchange ("TPEX") in December 2005, and after obtaining approval from the Financial Supervisory Commission, Executive Yuan in November 2006, the Corporation's shares were listed on the over-the-counter market (OTC) on January 11, 2007. In November 2009, the Corporation obtained approval to transfer listing of its shares to the Taiwan Stock Exchange ("TWSE") and were officially listed and started trading its shares on December 17, 2009.

The consolidated financial statements are presented in the Corporation's functional currency, the New Taiwan dollar.

2. APPROVAL OF FINANCIAL STATEMENTS

The consolidated financial statements were approved by the Corporation's board of directors on November 7, 2019.

3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

- a. Initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), Interpretations of IFRS (IFRIC) and Interpretations of IAS (SIC) (collectively, the "IFRSs") endorsed and issued into effect by the Financial Supervisory Commission (FSC)

Except for the following, whenever applied, the initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the IFRSs endorsed and issued into effect by the FSC would not have any material impact on the Group's accounting policies:

1) IFRS 16 Leases

IFRS 16 provides a comprehensive model for the identification of lease arrangements and their treatment in the financial statements of both lessee and lessor. It supersedes IAS 17 "Leases", IFRIC 4 "Determining whether an Arrangement contains a Lease", and a number of related interpretations. Refer to Note 4 for information relating to the relevant accounting policies.

Definition of a lease

The Group elects to apply the guidance of IFRS 16 in determining whether contracts are, or contain, a lease only to contracts entered into (or changed) on or after January 1, 2019. Contracts identified as containing a lease under IAS 17 and IFRIC 4 are not reassessed and are accounted for in accordance with the transitional provisions under IFRS 16.

The Group as lessee

The Group will recognize right-of-use assets and lease liabilities for all leases on the consolidated balance sheets except for those whose payments under low-value asset and short-term leases will be recognized as expenses on a straight-line basis. On the consolidated statements of comprehensive income, the Group will present the depreciation expense charged on right-of-use assets separately from the interest expense accrued on lease liabilities; interest is computed using the effective interest method. On the consolidated statements of cash flows, cash payments for the principal portion of lease liabilities will be classified within financing activities; cash payments for the interest portion will be classified within operating activities. Currently, payments under operating lease contracts are recognized as expenses on a straight-line basis. Prepaid lease payments for land use right of land located in mainland China are recognized as prepayments for leases. Cash flows for operating leases are classified within operating activities on the consolidated statements of cash flows.

Lease liabilities will be recognized on January 1, 2019 for leases currently classified as operating leases with the application of IAS 17. Lease liabilities will be measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate on January 1, 2019. Right-of-use assets will be measured at an amount equal to the lease liabilities. The Corporation will apply IAS 36 to all right-of-use assets.

The Group expects to apply the following practical expedients:

- The Group will apply a single discount rate to a portfolio of leases with reasonably similar characteristics to measure lease liabilities.
- The Group will account for those leases for which the lease term ends on or before December 31, 2019 as short-term leases.
- The Group will exclude initial direct costs from the measurement of right-of-use assets on January 1, 2019.
- The Group will use hindsight, such as in determining lease terms, to measure lease liabilities.

Group recognized lease liabilities will be measured at the incremental borrowing rate weighted average is 4.71% on January 1, 2019. An amount to the lease liabilities and non-cancellable operating lease and the amount to future minimum lease payments difference commentary on December 31, 2018:

The future minimum lease payments of non-cancellable operating lease commitments on December 31, 2018	\$ 409,224
Less: Recognition exemption for short-term leases	(9,438)
Undiscounted amounts on January 1, 2019	\$ 359,675
present value of incremental borrowing rate discounting on January 1, 2018	\$ 359,675
Lease liabilities recognized on January 1, 2019	\$ 359,675

The Group as lessor

Except for sublease transactions, the Group will not make any adjustments for leases in which it is a lessor and will account for those leases with the

application of IFRS 16 starting from January 1, 2019.

Adjusting the asset, liability and equity with the application of IFRS 16 starting from January 1, 2019.

2. IFRIC 23 “Uncertainty over Income Tax Treatments”

IFRIC 23 clarifies that when there is uncertainty over income tax treatments, the Group should assume that the taxation authority will have full knowledge of all related information when making related examinations. If the Group concludes that it is probable that the taxation authority will accept an uncertain tax treatment, the Group should determine the taxable profit, tax bases, unused tax losses, unused tax credits or tax rates consistently with the tax treatments used or planned to be used in its income tax filings. If it is not probable that the taxation authority will accept an uncertain tax treatment, the Group should make estimates using either the most likely amount or the expected value of the tax treatment, depending on which method the Group expects to better predict the resolution of the uncertainty. The application of the aforementioned amendments has no significant impact in 2019.

3. Annual Improvements to IFRSs 2015-2017 Cycle

Several standards, including IFRS 3 “Business Combination”, IFRS 11 “Joint Arrangements”, IAS 12 “Income Tax” and IAS 23 “Borrowing Costs”, were amended in this annual improvement. IAS 23 was amended to clarify that, if any specific borrowing remains outstanding after the related asset is ready for its intended use or sale, the related borrowing costs shall be included in the calculation of the capitalization rate on general borrowings. The application of the aforementioned amendments has no significant impact in 2019.

4) Amendments to IAS 19 “Plan Amendment, Curtailment or Settlement”

The amendments stipulate that, if a plan amendment, curtailment or settlement occurs, the current service cost and the net interest for the remainder of the annual reporting period are determined using the actuarial assumptions used for the remeasurement of the net defined benefit liabilities (assets). In addition, the amendments clarify the effect of a plan amendment, curtailment or settlement on the requirements regarding the asset ceiling. The Group will apply the above amendments prospectively.

Except for the above impacts, as of the date the consolidated financial statements were authorized for issue, the Group assessed the application of other standards and interpretations will have no significant impact on the Group’s financial position and financial performance. The application of the aforementioned amendments has no significant impact in 2019.

b. The IFRSs endorsed by the Financial Supervisory Commission (FSC) for application starting from 2020

New IFRSs	Effective Date Announced by IASB (Note 1)
Amendments to IFRS 3 “Definition of a Business”	January 1, 2020 (Note 1)
Amendments to IAS 1 and IAS 8 “Definition of Material”	January 1, 2020 (Note 2)

Note 1: The Group shall apply these amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2020 and to asset acquisitions that occur on or after the beginning of that period.

Note 2: The Group shall apply these amendments prospectively for annual reporting periods beginning on or after January 1, 2020.

As of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact that the application of other standards and interpretations will have on the Group’s financial position and financial performance and will disclose the relevant impact when the assessment is completed.

c. New IFRSs in issue but not yet endorsed and issued into effect by the FSC

New IFRSs	Effective Date Announced by IASB (Note 1)
Amendments to IFRS 9, IAS 39 and IFRS 7 “Interest Rate Benchmark Reform”	January 1, 2020
Amendments to IFRS 10 and IAS 28 “Sale or Contribution of Assets between an Investor and its Associate or Joint Venture”	To be determined by IASB
IFRS 17 “Insurance Contracts”	January 1, 2021

Note 1: Unless stated otherwise, the above New IFRSs are effective for annual periods beginning on or after their respective effective dates.

As of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact that the application of other standards and interpretations will have on the Group’s financial position and financial performance and will disclose the relevant impact when the assessment is completed.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Statement of compliance

These interim consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IAS 34 "Interim Financial Reporting" as endorsed and issued into effect by the FSC. Disclosure information included in these interim consolidated financial statements is less than the disclosure information required in a complete set of annual consolidated financial statements.

b. Basis of preparation

The consolidated consolidated financial statements have been prepared on the historical cost basis except for financial instruments which are measured at fair value, and net defined benefit liabilities which are measured at the present value of the defined benefit obligation less the fair value of plan assets.

The fair value measurements, which are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and based on the significance of the inputs to the fair value measurement in its entirety, are described as follows:

- 1) Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- 2) Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for an asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- 3) Level 3 inputs are unobservable inputs for an asset or liability.

c. Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Corporation and the entities controlled by the Corporation (i.e. its subsidiaries).

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the Corporation.

All intra-group transactions, balances, income and expenses are eliminated in full upon consolidation.

See Note 11 and Tables 7 and 8 for detailed information on subsidiaries (including percentages of ownership and main businesses).

d. Others significant accounting policies

Expect related accounting policies of leases and following descriptions, also could refer summary of significant accounting policies in 2018.

1. Lease 2019

At the inception of a contract, the Group assesses whether the contract is, or contains, a lease.

A. The Group as lessor

Leases are classified as finance leases whenever the terms of a lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

When a combined company sub-leases an right-of-use asset, it uses the right-of-use asset (not the underlying asset) to judge the classification of the sublease.

Under operating leases, the lease payments that are deducted from the lease incentives are recognized as income on a straight-line basis over the relevant lease periods.

B. The Group as lessee

Lease payments for asset leases and short-term leases, which are subject to the recognition of the waiver, are recognized as an expense on a straight-line basis over the lease term. Other leases recognize the right-of-use assets and lease liabilities on the lease beginning date.

The right-of-use asset is initially measured at cost (including the original measurement of the lease liability, lease payments received before the lease start date, original cost and estimated cost of the underlying asset). Subsequent measurement of the amount of accumulated depreciation and accumulated impairment losses at cost and adjust the re-measurement of the lease liability. The right-of-use asset is expressed separately in the consolidated balance sheet.

The right-of-use asset is depreciated on the straight-line basis from the commencement of the lease until the expiration of the end of the useful life or the expiration of the lease term.

Lease liabilities are initially measured as the present value of lease payments (including fixed payments.) If the lease implied interest rate is easy to judge, the lease payment is discounted using the interest rate. If the interest rate is not easy to judge, the lessee is used to increase the borrowing rate.

Subsequently, the lease liability is measured using the effective interest method on a post-amortization cost basis and the interest expense is apportioned during the lease period. Changes in future lease payments due to changes in the lease period, the consolidated company has to measure the lease liabilities and relatively adjust the right to use assets. However, if the amount of the right-of-use asset has been reduced to zero, then the remaining re-measurement amount is recognized in profit or loss. Lease liabilities are expressed separately in the consolidated balance sheet.

2018

When the lease terms transfer almost all the risks and rewards attached to the ownership of the asset to the lessee, then classify it as a finance lease. The other leases are classified as operating leases.

1. The Group as lessor

Lease income from operating leases is recognized as income on a straight-line basis over the relevant. Original direct costs incurred by negotiating and arranging operating leases, add to the carrying amount of the leased asset and recognized as a fee during the lease period on a straight-line basis.

2. The Group as lessee

Operating lease payments are recognized as expenses on a straight-line basis over the lease term.
Leasehold land for operating leases of land use rights in the PRC are amortized over the lease period on a straight-line basis.

2. Retirement benefits

The pension cost during the interim period is based on the actuarial cost rate determined by the actuarial at the end of the previous year, calculated based on the beginning of the year and the end of the current period, and for the major market fluctuations in this period and adjustments for the major market fluctuations in this period, major plan amendments, liquidations or other major one-off items.

3. Income Tax

Income tax expense is the sum of current income tax and deferred income tax. The income tax for the interim period is assessed on an annual basis, calculate the pre-tax profit before the period at the tax rate applicable to the expected total annual surplus. The impact of changes in the tax rate arising from the revision of the tax law during the period is consistent with the accounting principles of the transaction that generates the consequences of the taxation. Changes in tax rates relating to transactions recognized in profit or loss are included in the estimates of the annual average effective tax rates, recognized in profit or loss on a period-by-period basis

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

The main sources of significant accounting judgments, estimates, and assumptions used in the consolidated financial statements are in addition to the following and the others are the same as the 107 annual financial report.

1. Lease period (applicable in 2019)

When determining the lease term of the leased asset, the consolidation company considerations will generate economic incentives to exercise (or not exercise) all the relevant facts and circumstances of the option, includes expected changes in all facts and circumstances from the commencement date of the lease to the exercise of the option. The main factors considered include the contract terms and conditions of the period covered by the option, improvement of significant leasehold interest during the contract period and the importance of the underlying assets to the lessee's operations. Reassessment of the lease period when significant events or major changes occur within the control of the combined company

2. Lessee increase borrowing rate

Determining the lessee's incremental borrowing rate used for the lease payment discount, the risk rate is used as a reference rate for the period of existence and the risk-free rate of the currency. The risk-free interest rate for the period of existence and the currency is used as the reference interest rate and the estimated lessee credit risk discount and lease specific adjustments (for example, asset characteristics and factors such as guarantees) are taken into account.

The combined company successively signed a three-month structured time deposit contract with the bank on the nine months ended **September 30**, 2019, and 2018. The structured time deposit includes an embedded derivative that is not closely related to the master contract, because of the main contract included in the hybrid contract is an asset within the scope of IFRS 9, therefore, the assessment of the overall hybrid contract should be mandatory to be measured at fair value through profit or loss.

The average credit period of sales of goods was 150 days. No interest was charged on trade receivables. The Group uses other publicly available financial information or its own trading records to rate its major customers. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the management annually.

The Group applies the simplified approach to providing for expected credit losses prescribed, which permits the use of lifetime expected loss provision for all trade receivables. The expected credit losses on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of economic conditions at the reporting date. As the Group's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished according to the Group's different customer base.

The Group writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery. For trade receivables that have been written off, the Group continues to engage in enforcement activity to attempt to recover the receivables due. Where recoveries are made, these are recognized in profit or loss.

The following table details the loss allowance of trade receivables based on the Group's provision matrix.

Advance receipts for ordinary shares	<u>\$ 1,237,242</u>	<u>\$ 1,237,242</u>	<u>\$ 1,237,242</u>

Fully paid ordinary shares, which have a par value of NT\$10, carry one vote per shares and right to dividends.

The authorized shares include 3,000 thousand shares allocated for the exercise of employee stock options.

In order to increase the return on equity and adjust the capital structure, the board of directors resolved to reduce capital, which was approved by the shareholders during the shareholders' meeting held on June 29, 2018. The capital reduction was approved by the Securities and Futures Bureau of the Financial Supervisory Commission on August 20, 2018 under Rule No. 1070328691 and the record date of capital reduction approved by the board of directors was September 3, 2018, following the resolution of the board meeting. The aforementioned capital was reduced by approximately 25%, which amounted to \$412,414 thousand and comprises 41,241 thousand ordinary shares. After reducing capital, the paid-in capital was \$1,237,242 thousand with a par value of \$10 (in dollars) per share, consisting of 123,724 thousand ordinary shares.

For the nine months ended September 30, 2018, 1,392 thousand ordinary shares were converted from the second domestic unsecured convertible bonds. On March 27, 2017, the record date of capital increase, the Corporation transferred 1,392 thousand shares from the advance receipts of share capital to ordinary shares.

b. Capital surplus

Capital surplus may be used to offset a deficit; in addition, when the Corporation has no deficit, such capital surplus may be distributed as cash dividends or transferred to share capital (limited to a certain percentage of the Corporation's capital surplus and to once a year).

Capital surplus arises from the effect of changes in ownership interests in subsidiaries resulting from equity transactions other than actual disposals or acquisitions, or from changes in capital surplus of subsidiaries accounted for using the equity method.

The capital surplus generated from the stock option of the convertible bonds could not be used for other purposes.

c. Retained earnings and dividends policy

Under the dividends policy as set forth in the amended Articles, where the Corporation made a profit in a fiscal year, the profit shall be first utilized for paying taxes, offsetting losses of previous years, setting aside as a legal reserve of 10% of the remaining profit, setting aside or reversing a special reserve in accordance with the laws and regulations, and then any remaining profit together with any undistributed retained earnings shall be used by the Corporation's board of directors as the basis for proposing a distribution plan, which should be resolved in the shareholders' meeting for the distribution of dividends and bonuses to shareholders. For the policies on the distribution of employees' compensation and remuneration of directors and supervisors after the amendment, refer to employees' compensation and remuneration of directors and supervisors in Note 21-b.

As the Corporation is currently in the growth stage, the Corporation considers its industry development and long-term interests of shareholders as well as its programs to maintain operating efficiency and meet its financial goals when determining the distribution of bonuses in shares or cash. The board of directors shall propose allocation ratios every year and propose such allocation ratio at the shareholder's meeting. For the distribution of bonuses to shareholders, cash dividends are preferred. Distribution of earnings may also be made in the form of stock dividends; provided that the ratio of cash dividends distributed is 5% to 100% of the total dividends distributed.

An appropriation of earnings to a legal reserve shall be made until the legal reserve equals the Corporation's paid-in capital. The legal reserve may be used to offset deficits. If the Corporation has no deficit and the legal reserve has exceeded 25% of the Corporation's paid-in capital, the excess may be transferred to capital or distributed in cash.

Items referred to under Rule No. 1010012865 and Rule No. 1010047490 issued by the FSC and in the directive titled "Questions and Answers for Special Reserves Appropriated Following Adoption of IFRSs" should be appropriated to or reversed from a special reserve by the Corporation.

The appropriations of earnings for 2018 and 2017 which were approved in the shareholders' meetings on June 29, 2018 and holding a board of directors June 20, 2019, respectively, were as follows:

	Appropriation of Earnings For the Year Ended December 31		Dividends Per Share (NT\$) For the Year Ended December 31	
	2018	2017	2018	2017
	Legal reserve	\$ 88,996	\$ 86,944	
Special reserve	54,857	145,733

Deductions for other equity items	<u>\$ 54,857</u>	<u>\$ 145,733</u>
Ending balance	<u>\$ 431,506</u>	<u>\$ 376,649</u>

On the initial application of the IFRSs, the net increase arising from the retained earnings was not enough for the special reserve appropriation; thus, the Group appropriated a special reserve at the amount of \$230,916 thousand. Additional special reserve should be appropriated for the amount equal to the difference between net debit balance reserves and the special reserve appropriated on the first-time adoption of IFRSs. Any special reserve appropriated may be reversed to the extent that the net debit balance reverses and is thereafter, distributed.

d. Financial risk management objectives and policies

The Group's major financial instruments include cash and cash equivalents, financial assets that are measured at fair value through profit or loss, measured at amortized cost, financial instruments held for trading, equity investments, trade receivables and trade payables. The Group's corporate treasury function provides services to the business, coordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyze exposures by degree and magnitude of risks. These risks include market risk (including foreign currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

1) Market risk

The Group's activities exposed it primarily to the financial risks of changes in foreign currency exchange rates (see (a) below) and interest rates (see (b) below). There is no change in the method of the measurement of market risk.

There has been no change to the Group's exposure to market risks or the manner in which these risks are managed and measured.

a) Foreign currency risk

Several subsidiaries of the Corporation have foreign currency sales and purchases, which exposes the Group to foreign currency risk. The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities (including those eliminated on consolidation) and of the derivatives exposed to foreign currency risk at the end of the reporting period are set out in Note 27.

Sensitivity analysis

The Group is mainly exposed to the USD and RMB.

The following table details the Group's sensitivity to a 1% increase and decrease individual functional currency against the relevant foreign currencies. If the loss of financial assets is measured at fair value through profit or loss as a contract used when reporting foreign currency risk internally to key management personnel and representing management's assessment of the reasonably possible change in foreign exchange rates is 1%. The sensitivity analysis included only outstanding foreign currency denominated monetary items and foreign exchange forward contracts designated as cash flow hedges, and adjusts their translation at the end of the reporting period for a 1% change in foreign currency rates. A negative number below indicates a decrease in pre-tax profit associated with the New Taiwan dollar strengthening 1% against the relevant currency. For a 1% weakening of the New Taiwan dollar against the relevant currency, there would be an equal and opposite impact on pre-tax profit, and the balances below would be positive.

	For the nine months ended	
	September 30	
	2019	2018
<u>USD impact</u>		
USD:NTD	\$ 3,778	\$ 1,688
USD:RMB	\$ (29,922)	\$ (26,776)
<u>RMB impact</u>		
RMB:NTD	\$ (1,128)	\$ (1,128)
RMB:USD	\$ (960)	\$ (3,684)

This was mainly attributable to the exposure on outstanding receivables in USD and RMB which were not hedged at the end of the reporting period.

In management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign currency risk because the exposure at the end of the reporting period did not reflect the exposure during the period.

b) Interest rate risk

The Group is exposed to interest rate risk because entities in the Group borrow funds at both fixed and floating interest rates.

The carrying amounts of the Group's financial assets and financial liabilities with exposure to interest rates at the end of the reporting period were as follows:

	September 30	December 31	September 30
	2019	2018	2018
Fair value interest rate risk			
Financial assets	\$ 425,221	\$ 602,521	\$ 228,230
Financial liabilities	128,287	230,000	200,000
Cash flow interest rate risk			
Financial assets	2,257,258	2,071,375	2,527,644

Sensitivity analysis

The sensitivity analysis below was determined based on the Group's exposure to interest rates for both derivative and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis was prepared assuming the amount of each liability outstanding at the end of the reporting period was outstanding for the whole year. A 100 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 100 basis points higher/lower and all other variables were held constant, the Group's pre-tax profit for the nine months ended September 30, 2018 and 2019 would decrease/increase by \$ 16,929 thousand and \$ 17,460 thousand, respectively, which was mainly attributable to the Group's exposure to interest rates on its variable-rate deposits.

c) Other price risk

The Group was exposed to equity price risk through its investments in domestic listed shares, domestic emerging market shares, mutual funds and overseas unlisted shares. In addition, the Group has appointed a special team to monitor the price risk and will consider hedging the risk exposure should the need arise.

Sensitivity analysis

The sensitivity analysis below was determined based on the exposure to equity price risks at the end of the reporting period.

If equity prices had been 1% higher/lower, pre-tax profit for the nine months ended September 30, 2018 and 2019 would have increased/decreased by \$ 601 thousand and \$ 1,822 thousand, as a result of the changes in fair value of financial assets at FVTPL.

2) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the Group. As at the end of the reporting period, the Group's maximum exposure to credit risk, which would cause a financial loss to the Group due to the failure of the counterparty to discharge its obligation and due to the financial guarantees provided by the Group, could be equal to the total of the carrying amount of the respective recognized financial assets as stated in the balance sheets.

In order to reduce credit risk, the management team of the Group designated a special team to decide the credit ratings of counterparties and other monitoring procedures to make sure there are appropriate actions taken to collect the overdue receivables. Additionally, on each balance sheet date, the Group reviews the recoverable amounts to ensure appropriate allowances have been made for doubtful accounts. Therefore, the Group considers its credit risk to be significantly reduced.

The Group continuously assesses the financial conditions of customers with outstanding receivables.

As the counterparties of the Group are financial institutions and companies with good credit ratings, the Group has limited credit risk.

3) Liquidity risk

The Group manages liquidity risk by monitoring and maintaining a level of cash and cash equivalents deemed adequate to finance the Group's operations and mitigate the effects of fluctuations in cash flows. In addition, management monitors the utilization of bank borrowings and ensures compliance with loan covenants.

The Group relies on bank borrowings as a significant source of liquidity. As of September 30 and December 31 2018 and September 30, 2019 the Group had available unutilized short-term bank loan facilities set out in (b) below.

a) Liquidity and interest rate risk tables for non-derivative financial liabilities

The following table details the Group's remaining contractual maturities for its non-derivative financial liabilities with agreed repayment periods. The table has been drawn up based on the undiscounted cash flows of financial liabilities from the earliest date on which the Group can be required to pay. The table included both interest and principal cash flows. Specifically, bank loans with a repayment on demand clause were included in the earliest time band regardless of the probability of the banks choosing to exercise their rights. The maturity dates for other non-derivative financial liabilities were based on the agreed repayment dates.

To the extent that interest flows are at floating rates, the undiscounted amount was derived from the interest rate curve at the end of the reporting period.

29. SEGMENT INFORMATION

Information reported to the chief operating decision maker for the purpose of resource allocation and assessment of segment performance focuses on the types of goods or services delivered or provided. Specifically, the Group's reportable segments under IFRS 8 "Operating Segments" were electronic equipment and molding.

No operating segments were closed during the year.

a. Segment revenue and results

The following was an analysis of the Group's revenue and results from continuing operations by reportable segments:

	Income		Loss

Shares of benefits of related companies recognized using equity method			12,745	24,089
Income before tax			<u>\$ 1,071,159</u>	<u>\$ 1,011,584</u>

The above segment revenues and results were generated from the transactions with external customers. There were no inter-segment transactions for the nine months ended September 30, 2019 and 2018.

Segment profit represented the profit before tax earned by each segment without allocation of central administration costs and directors' salaries, share of profit of associates, interest income, exchange gains or losses, valuation gains or losses on financial instruments, finance costs and income tax expense. This was the measure reported to the chief operating decision maker for the purpose of resource allocation and assessment of segment performance.

b. Segment total assets

The Group has no key operational personnel to monitor segment performance, and thus, the amount of segment assets is zero.

Note 1: 0 represents the parent company and the subsidiaries are numbered from 1.

Note 2: 1 represents transactions from the parent company to the subsidiaries, 2 represents transactions from the subsidiaries to the parent company, and 3 represents transactions between the subsidiaries.

Note 3: The monetary amount of the transaction is calculated based on percentage of total sales or assets. If the account is an asset or a liability, the ratio is calculated using the ending balance. If the account is in the income statement, the ratio is calculated using cumulative amount during that period.

Note 4: The above table reveals that the standard is 10% of the subject of the trader and the transaction amount reaches 10,000 thousand.

Note 5: All the transactions in the table above have been eliminated during the preparation of the consolidated financial statements.
